

January 2, 2009

Republic Conduit's Electrunite® Electrical Metallic Tubing (EMT) is the easiest electrical conduit to bend currently available in the marketplace. It is also the thinnest and lightest of all of our products. Republic's EMT is manufactured from high-quality, flat rolled steel and is produced using Republic Conduit's exclusive ElectroGalvanizing process, which provides a protective surface coating of satin-smooth, corrosion-resistant zinc to the tube. A secondary treatment following the zinc coating extends surface protection of Republic Conduit's EMT.

All of Republic Conduit's EMT sizes are manufactured in the United States: smaller EMT sizes (½", ¾", and 1") are produced at our Cedar Springs, GA facility, and the larger sizes are made at our Louisville, KY plant. Trade sizes range from ½" to 4".

Features and Benefits

- Easier Wire Pulling and Pushing – diamond-shaped ID pattern and protective, slick, inside coating (Silverslick®), reduce friction when pulling / pushing the wires. The Silverslick finish stays hard and smooth in various climate conditions, protecting your conduit and your investment.
- Accurate, Time-Efficient Bending – because ½", ¾", and 1" sizes of Republic Conduit's EMT are Inch-Marked® and Guide-Lined®, the product is easier to cut and bend properly right away, further reducing waste.
- Lower Life-Cycle Costs – steel conduit is impact and fire resistant, chemically compatible with concrete and resists cracking, flaking and damage from severe bending. Its physical and mechanical properties ensure that the pipe has an extended shelf life, great for usage and storage without degradation in quality.

About Republic Conduit

Republic Conduit is a U.S. manufacturer of quality electrical steel conduit of multiple sizes and types. As a result of our eighty-year history in the electrical conduit industry, Republic has achieved strong name recognition. Over the years, Republic Conduit, as a domestic brand, has undergone several name changes: from Republic Steel, to LTV Steel Tubular Products, to LTV Copperweld, to Maverick Tube Corporation, and, finally, to Republic Conduit. Throughout this time, the company remained solely focused on delivering solid, quality conduit, which customers ask for by name time and time again. In October of 2006, Republic Conduit became part of the Tenaris Group.
