

January 2, 2009

Republic Conduit's Intermediate Metal Conduit (IMC) is manufactured to ANSI specification C80.6 and UL standard 1242. It is made from high quality, flat rolled steel, and is a cost effective alternative to Republic's Galvite® Electrical Rigid Metal Conduit-Steel.

All of Republic Conduit's IMC sizes are manufactured in the United States: smaller IMC sizes ($\frac{1}{2}$ ", $\frac{3}{4}$ ", and 1") are produced at our Cedar Springs, GA facility, and the larger sizes are made at our Louisville, KY plant. Trade sizes range from $\frac{1}{2}$ " to 4".

Features and Benefits

- Consistent Quality – Republic Conduit's IMC is manufactured for long life and provides complete physical and mechanical protection for any electrical wiring job. For over 80 years, Republic Conduit's products have been and are today manufactured to required customer specifications.
- Cost-Effective – IMC's thin walls allow for lower material and shipping costs, while its consistently accurate metallurgical properties and smooth surfaces require less installation capital spent on wiring projects.
- Easier Installs – IMC's protective, slick, Silverslick® ID coating reduces friction when pulling / pushing the wires. Additionally, the OD surfaces are zinc-coated, and the threaded ends are painted for further corrosion protection (the entire finish stays hard and smooth in various climate conditions).

About Republic Conduit

Republic Conduit is a U.S. manufacturer of quality electrical steel conduit of multiple sizes and types. As a result of our eighty-year history in the electrical conduit industry, Republic has achieved strong name recognition. Over the years, Republic Conduit, as a domestic brand, has undergone several name changes: from Republic Steel, to LTV Steel Tubular Products, to LTV Copperweld, to Maverick Tube Corporation, and, finally, to Republic Conduit. Throughout this time, the company remained solely focused on delivering solid, quality conduit, which customers ask for by name time and time again. In October of 2006, Republic Conduit became part of the Tenaris Group.
