Republic Conduit's Galvite® Electrical Rigid Metal Conduit-Steel (Galvite® ERMC-S) means superior protection, strength, safety, and ductility for your wiring jobs. This product is Hot-Dip Galvanized inside and out and is ideal for jobs where severe bending may be required. Because Republic Galvanizes the entire length of the pipe (including cut surfaces on each end), our conduit is better protected from rusting.

All of Republic Conduit's Galvite ERMC-S sizes are manufactured in the United States. Trade sizes range from ½" to 6".

Features and Benefits

- Consistent Quality – Republic's Galvite ERMC-S is manufactured for long life; it is durable, strong, and suitable for harshest environmental conditions. The metal is welded to ensure quality standards are met and exceeded. The inside surface of the pipe is obstruction-free and extra smooth, making wire pulling and pushing easy. The product is easy to cut, form and join.
- Lower Life-Cycle Costs – Republic's Galvite ERMC-S resists cracking, flaking, peeling, impact, and damage from severe bending. Its physical and mechanical properties ensure that the pipe has an extended shelf life, great for usage or storage without degradation in quality.
- Protection from Environmental Damage and Mechanical Use – the thorough inside and outside zinc coating of Republic Conduit's Galvite ERMC-S provides enhanced, second to none corrosion protection.

About Republic Conduit

Republic Conduit is a U.S. manufacturer of quality electrical steel conduit of multiple sizes and types. As a result of our eighty-year history in the electrical conduit industry, Republic has achieved strong name recognition. Over the years, Republic Conduit, as a domestic brand, has undergone several name changes: from Republic Steel, to LTV Steel Tubular Products, to LTV Copperweld, to Maverick Tube Corporation, and, finally, to Republic Conduit. Throughout this time, the company remained solely focused on delivering solid, quality conduit, which customers ask for by name time and time again. In October of 2006, Republic Conduit became part of the Tenaris Group.
